Kafka Architecture

The background features a light gray abstract pattern with various shapes, including squares with wavy lines and circles with dots, connected by thin gray lines.

Demo: Setup Kafka

Setup Kafka on Mac OS

The background features a light gray abstract design with various shapes, including squares with wavy patterns, circles with dots, and curved lines.

Demo: Kafka with Python Application

Create a simple consumer and producer and exchange message using Kafka

Handling Failures and Building a Resilient System

Core Capabilities

High throughput

Scalable

Permanent storage

High availability

Ecosystem

Built-in stream processing

Connect to almost anything

Client libraries

**Large ecosystem open source
tools**

Kafka Use Cases

User activity tracking

Log aggregation

Metrics collection

Commit log

Stream processing

Points of Failure

Broker Failure

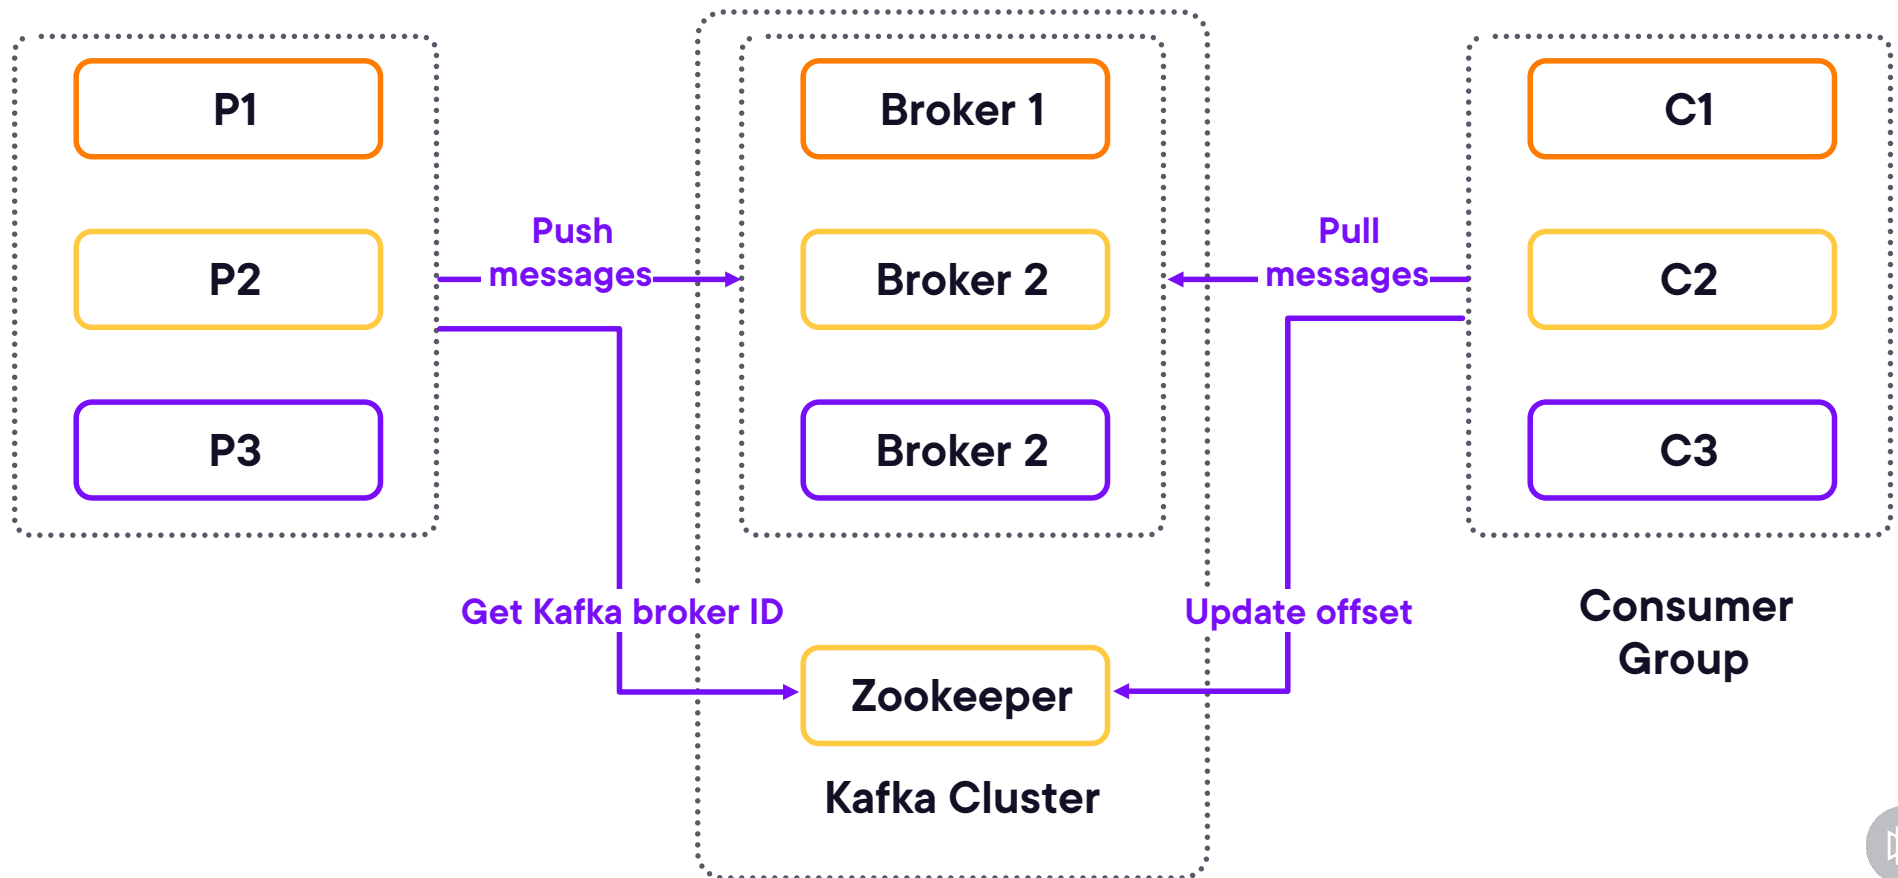

Producer Failure

Consumer Failure

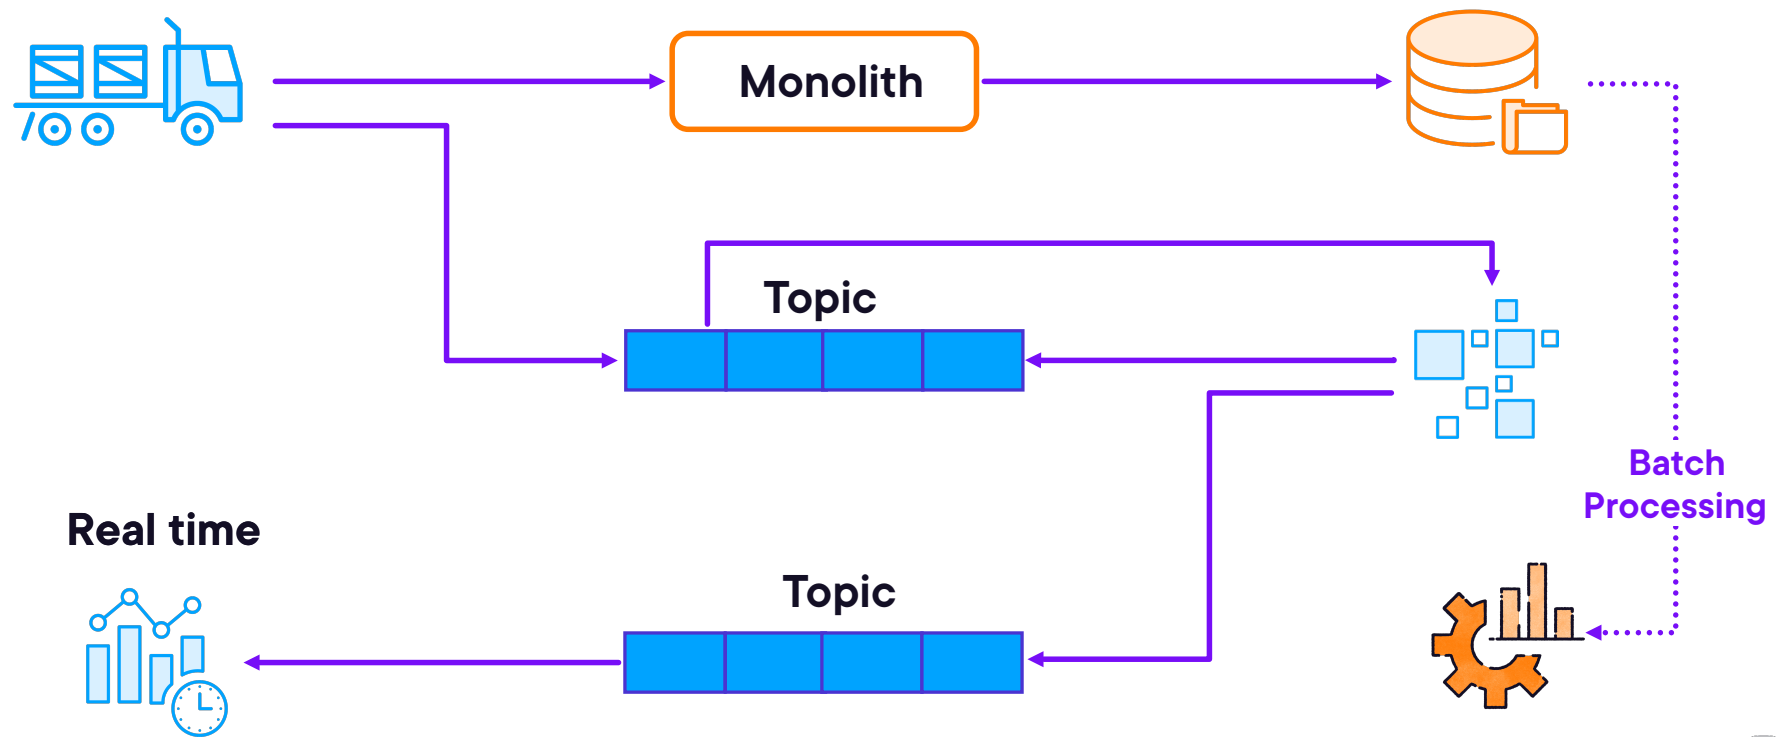

**Partition Leader
Failure**

Network Issues

Kafka Architecture

Kafka on High Level

Kafka Connect

Single Partition Topic

Topic with Three Partition

Partition 0

0	1	2	3	4	5
---	---	---	---	---	---

Partition 1

0	1	2	3	4	5
---	---	---	---	---	---

Partition 2

0	1	2	3	4	5
---	---	---	---	---	---
